

Junior Kangaroo Mathematical Challenge

Tuesday 12th June 2018

Organised by the United Kingdom Mathematics Trust

The Junior Kangaroo allows students in the UK to test themselves on questions set for young mathematicians from across Europe and beyond.

RULES AND GUIDELINES (to be read before starting):

1. Do not open the paper until the Invigilator tells you to do so.
2. Time allowed: **1 hour**.
No answers, or personal details, may be entered after the allowed hour is over.
3. The use of rough paper is allowed; **calculators** and measuring instruments are **forbidden**.
4. Candidates in England and Wales must be in School Year 8 or below.
Candidates in Scotland must be in S2 or below.
Candidates in Northern Ireland must be in School Year 9 or below.
5. **Use B or HB pencil only**. For each question mark *at most one* of the options A, B, C, D, E on the Answer Sheet. Do not mark more than one option.
6. Five marks will be awarded for each correct answer to Questions 1 - 15.
Six marks will be awarded for each correct answer to Questions 16 - 25.
7. *Do not expect to finish the whole paper in 1 hour*. Concentrate first on Questions 1-15. When you have checked your answers to these, have a go at some of the later questions.
8. The questions on this paper challenge you **to think**, not to guess. Though you will not lose marks for getting answers wrong, you will undoubtedly get more marks, and more satisfaction, by doing a few questions carefully than by guessing lots of answers.

*Enquiries about the Junior Kangaroo should be sent to: Maths Challenges Office,
School of Mathematics, University of Leeds, Leeds, LS2 9JT.*

(Tel. 0113 343 2339)

1. Which calculation gives the largest result?

- A $2 + 0 + 1 + 8$ B $2 \times 0 + 1 + 8$ C $2 + 0 \times 1 + 8$
 D $2 + 0 + 1 \times 8$ E $2 \times 0 + 1 \times 8$

2. Which of the following expressions, when it replaces the symbol Ω , makes the equation $\Omega \times \Omega = 2 \times 2 \times 2 \times 2 \times 3 \times 3$ correct?

- A 2 B 3 C 2×3 D $2 \times 3 \times 3$ E $2 \times 2 \times 3$

3. Each of the designs shown is initially divided into squares. For how many of the designs is the total area of the shaded region equal to three-fifths of the area of the whole design?

- A 0 B 1 C 2 D 3 E 4

4. Milly likes to multiply by 3, Abby likes to add 2 and Sam likes to subtract 1. In what order should they perform their favourite actions to start with 3 and end with 14?

- A MAS B MSA C AMS D ASM E SMA

5. Emily has two identical cards in the shape of equilateral triangles. She places them both onto a sheet of paper so that they touch or overlap and draws around the shape she creates. Which one of the following is it impossible for her to draw?

6. Lucy has lots of identical lolly sticks. She arranges the lolly sticks end to end to make different triangles. Which number of lolly sticks could she not use to make a triangle?

- A 7 B 6 C 5 D 4 E 3

7. In the triangle PQR , the lengths of sides PQ and PR are the same. The point S lies on QR so that $QS = PS$ and $\angle RPS = 75^\circ$. What is the size of $\angle QRP$?

- A 35° B 30° C 25° D 20° E 15°

8. William has four cards with different integers written on them. Three of these integers are 2, 3 and 4. He puts one card in each cell of the 2×2 grid shown. The sum of the two integers in the second row is 6. The sum of the two integers in the second column is 10. Which number is on the card he places in the **top left** cell?

- A 2 B 3 C 4 D 6 E Can't be sure

9. Tom throws two darts at the target shown in the diagram. Both his darts hit the target. For each dart, he scores the number of points shown in the region he hits. How many different totals could he score?

- A 6 B 7 C 8 D 9 E 10

10. The diagram below shows five rectangles, each containing some of the letters P, R, I, S and M.

Harry wants to cross out letters so that each rectangle contains only one letter and each rectangle contains a different letter. Which letter does he not cross out in rectangle 2?

- A P B R C I D S E M

19. My TV screen has sides in the ratio 16 : 9. My mother's TV screen has sides in the ratio 4 : 3. A picture which exactly fills the screen of my TV only fills the width of the screen of my mother's TV.

Ratio 16:9

Ratio 4:3

What fraction of the screen on my mother's TV is not covered?

- A $\frac{1}{6}$ B $\frac{1}{5}$ C $\frac{1}{4}$ D $\frac{1}{3}$ E It depends on the size of the screen.
20. Steven subtracts the units digit from the tens digit for each two-digit number. He then finds the sum of all his answers.

What is the value of Steven's sum?

- A 30 B 45 C 55 D 90 E 100
21. In triangle PQR , the point S is on PQ so that the ratio of the length of PS to the length of SQ is 2: 3. The point T lies on SR so that the area of triangle PTR is 20 and the area of triangle SQT is 18, as shown in the diagram.

What is the area of triangle PQR ?

- A 100 B 90 C 80 D 70 E 60
22. The diagram shows a plan of a town with various bus stops. There are four bus routes in the town.
 Route 1 goes C – D – E – F – G – H – C and is 17 km long.
 Route 2 goes A – B – C – F – G – H – A and is 12 km long.
 Route 3 goes A – B – C – D – E – F – G – H – A and is 20 km long.
 Route 4 goes C – F – G – H – C.

How long is route 4?

- A 10 km B 9 km C 8 km D 7 km E 6 km
23. Three friends, Ms Raja, Ms Omar and Ms Beatty all live in the same street. They are a doctor, an engineer and a musician in some order. The youngest one, the doctor, does not have a brother. Ms Beatty is older than the engineer and is married to Ms Omar's brother.

What are the names, in order, of the doctor and the engineer?

- A Raja and Omar B Omar and Beatty C Beatty and Omar
 D Raja and Beatty E Omar and Raja

24. In the sum KAN each letter stands for a different digit.

$$\begin{array}{r} KAN \\ + GA \\ \hline ROO \end{array}$$

What is the answer to the subtraction RN ?

$$\begin{array}{r} RN \\ - KG \\ \hline \end{array}$$

- A 10 B 11 C 12 D 21 E 22
25. What is the largest number of digits that can be erased from the 1000-digit number 201820182018....2018 so that the sum of the remaining digits is 2018?

- A 343 B 582 C 671 D 741 E 746
